

AGR - Avangrid

Avangrid Inc., based in the US, is a leading sustainable energy company with two lines of business: Avangrid Networks and Avangrid Renewables. The renewables business is among the top wind energy asset operators in the US, with 6.6 GW of installed renewables capacity and nearly 1 GW of onshore wind projects under construction. The company plans to increase Avangrid Renewables' installed capacity by 2 GW to 8.6 GW by 2022, a 31% increase compared to 2018 capacity. In 2018, 89% of AGR's generation capacity was carbon-free wind and solar power. The energy delivered from AGR's facilities has allowed its customers to avoid 12 million metric tons of CO₂.

DNNGY - Ørsted A/S

Ørsted A/S, based in Denmark, operates as a utility that develops, constructs, and operates offshore and onshore wind farms, solar farms, bioenergy plants, and waste-to-energy solutions. The company is a global leader in offshore wind generation development and operation, an area of renewable energy increasingly targeted for development globally due to improving economics, ability to scale and more consistent wind speeds. In 2019, 86% of its total energy generation came from renewable sources, installing 6.8GW of offshore wind power and another 3.0 GW of offshore wind under construction.
